Attention: Rob Ansems
Zinc Business Manager
Professional Plating

Subject: Dipsol Process

Dear Rob:

Dipsol of America, Inc. is proud to inform you that, with the support of Enthone, Professional Plating is running the Dipsol ZT-444 and Dipsol 916-TS chemical system.

The Dipsol ZT-444 and Dipsol 916-TS chemical system is approved by General Motors's GMW 3044 code X specification.

After our assessment, we find that Professional Plating fully meets AIAG's CQI-11 standards. Dipsol qualifies Professional Plating to process parts per GMW 3044 code X

GM no longer issues approval notes for GMW 3044 code X or N (non-fasteners).

Thank you for allowing both Dipsol and Enthone to assist you in your chemical needs. We can be reached at (734) 261-0633 for further information.

Regards

Tarek Nahlawi
